

# Revolutionizing the Composites Industry.

RAKU<sup>®</sup> TOOL WB-0890 – the new epoxy board standard.

## Product Highlights

The new epoxy board was developed in conjunction with the engineering company of racing and high performance road cars, Dallara Automobili, Italy.

### Superb surface

- Finest surface structure
- Less finishing time
- Significantly less sealer needed
- Surface quality finish of master model is transferred onto prepreg mold
  - > no re-sanding of mold necessary
  - > prolonged service life of prepreg molds

### Excellent compatibility

- Compatible with all paints, release agents and epoxy prepregs in line with industry standards

### First-rate milling characteristics

- Easy and quick to machine
- Very good chip formation, no sticking

### Tg - 110 °C

- HDT 100 – 110 °C
- Dimensionally stable

### Applications

- Specially suited for prepreg lay-up tools and vacuum forming molds
- Racing sports, marine, aerospace and medical technology

### Outstanding mechanical properties

- Fantastic edge strength

Our recommendations on the use of the material are based on many years of experience and current scientific and practical knowledge. They are, however, provided without any obligation on our part and do not relieve the buyer of the need for suitability tests. They do not constitute a legal relationship, nor are any protected third party rights whatsoever affected thereby. No liability accepted for misprints.
